Attachments: NSTI Bldg 3 Wastewater Drains TSP Final 13 May 2013.pdf; smime.p7s

Hi David,

We sent the Sampling and Analysis Plan separately on May 10. You should have received a copy; if not, please let me know.

The exact survey plans are covered under Task Specific plans (TSPs) which are short documents that go into more detail for each project area that we are working on. TSPs are shorter, more detailed documents that are reviewed internally by BRAC and RASO, but do not require BCT review. This allows us to get these smaller plans completed quickly as long as they are compliant with the Basewide Radiological Management Plan. This strategy is similar to work at Hunter's Point and Alameda. I sent out the TSP for Building 3 and select wastewater lines and it is attached here.

Let me know if you have any other questions.

V/r,
Danielle Janda

Hi Danielle,

Rob just sent me his review. I'm going to send some comments on to you tomorrow, but we had one question:

Rob observes: "The Executive Summary states from the outset that the document does not include either a Sampling and Analysis Plan, or Data Quality Objectives, or a survey design or survey plan, stating only that those items will be supplied under separate cover."

Can you clarify whether these items exist or will be developed? Since EPA is not the lead on TI and I don't follow everything as closely as I would like, perhaps you could provide us some background on the origin and purpose of this document.

Thanks,

David Stensby
US EPA Region 9

Hi David,

If you or ROB have any questions during your review feel free to give me a call.

V/r,
Danielle Janda

Yes, I will check when I am back in the office tomorrow and let you and Danielle know. I'm sorry I missed the boat on the plan, but will ask Rob to at least take a quick look. I don't want to delay things, so if he's too busy, we'll reconsider. I'll be in touch tomorrow.

I believe the Rad plan was sent out in hard copy but there is always a CD with the document. Do you want to check that you got the document and let me know that you did/did not get a copy?

I have cc'd Danielle on this email because she will be interested to know that Rob Terry may be looking at it. However I know that the Navy is looking for feedback ASAP so they get into the filed in June.

Jessica

Thanks. I looked for the Basewide Rad Mgmt. Plan when she sent an email. I couldn't find an email that sent it electronically. Was it only sent in hard copy? Sorry to bother you, but if I think I would like to have Rob Terry, our EPA Tech Support Rad person take at least a quick look at it. I've been dealing with a FOIA for another site and am now returning my focus on TI, but with all the interest in the Rad side, I'd like to get Rob's input. If it was only sent electronically, I'm sure I have it and probably just didn't register it.

I don't think EPA will comment on the Site 27 RAWP.

Thanks

Hi David,
I recall that was Lora Battaglia regarding the Site 27 RAWP, but I don't see May 9th as the due date on the DTS for the RAWP.

I see that Danielle's Basewide Rad Mgmt Plan also has outstanding comments due on May 12, which also isn't the 9th.

You may just want to follow up with both of them!

Jessica

Hi Jessica,

I don't know if you will be able to answer this, but if not, perhaps you can send my question along to the right person. At one point, someone mentioned a document that had comments due on May 9 and that the Navy was still waiting for comments from the Water Board and EPA. I didn't get the name of the document or the person speaking. I would like to follow up, so if you know what the document is, please let me know.

Thanks,

David
